291-62

PHILIPS TECHNICAL REVIEW

VOLUME 43
1986/87

PHILIPS

Philips Technical Review (ISSN 0031-7926) is published by Philips Research Laboratories, Eindhoven, the Netherlands, and deals with the investigations, processes and products of the laboratories and other establishments that form part of or are associated with the Philips group of companies. In the articles the associated technical problems are treated along with their physical or chemical background. The Review covers a wide range of subjects, each article being intended not only for the specialist in the subject but also for the non-specialist reader with a general technical or scientific training.

The Review appears in English and Dutch editions; both are identical in contents. There are twelve numbers per volume, each of about 32 pages. An index is included with each volume and indexes covering ten volumes are published (the latest one was included in Volume 40, 1982).

Editors:	Dr J. W. Broer
	Dipl.-Phys. R. Dockhorn, Editor-in-chief
	Dr E. Fischmann
	Dr J. L. Sommerdijk
	Ir N. A. M. Verhoeckx
	Dr M. H. Vincken
	Ir F. Zuurveen
Editorial assistants:	H. A. M. Lempens
	Ing. P. Post
	T. M. B. Schoenmakers
	J. H. T. Verbaant
English edition:	D. A. E. Roberts, B.Sc., M. Inst. P., M.I.T.I.

© N.V. Philips' Gloeilampenfabrieken, Eindhoven, the Netherlands, 1987. Articles may be reproduced in whole or in part provided that the source 'Philips Technical Review' is mentioned in full; photographs and drawings for this purpose are available on request. The editors would appreciate a complimentary copy.

Subject index, Volume 43, 1986/87

Page

Accordion imager, new solid-state image sensor 1
Battery, rechargeable, nickel-hydride cell . . . 22
Black-cobalt coating for solar collectors . . . 244
CARIN car information and navigation system 317
Ceramic differential-pressure transducer . . . 86
CM12/STEM microprocessor-controlled scanning-transmission electron microscope . . . 273
Dielectric resonators for microwave integrated oscillators . . . 35
Displacement meter based on the laser-Doppler principle . . . 180
Electron microscope, CM12/STEM scanning-transmission, with microprocessor control. . 273
Fifty years ago, excerpts from Volume 1
  superheterodyne reception . . . 9
  X-rays in investigation of materials . . . 9
Glass formation in industry . . . 253
HD-MAC: a step forward in television technology . . . 197
Image bulk storage, mobile system for . . . 260
Image sensor, new solid-state . . . 1
Industrial development in Europe, future of (speech) . . . 77
Interactive MR image synthesis . . . 95
Interfaces, looking at (inaugural address) . . 220
Ion-implantation machine, open, 800 kV . . . 169
Laser-Doppler principle, displacement meter based on . . . 180
Layered semiconductor structures (special issue)
  editorial . . . 109
  research on layered semiconductor structures 111
  metal-organic vapour-phase epitaxy of multilayer structures with III-V semiconductors 118
  metal-organic vapour-phase epitaxy with a novel reactor and characterization of multilayer structures . . . 133
  molecular beam epitaxy of multilayer structures with GaAs and $Al_xGa_{1-x}As$ . . . 143
  silicon molecular beam epitaxy on GaP and GaAs . . . 154
Local-area network, PHILAN fibre-optic . . . 10
Metal-organic vapour-phase epitaxy of multilayer structures . . . 133
Metastable phases and thermodynamic equilibrium . . . 304

Page

Microwave integrated oscillators, dielectric resonators for . . . 35
Mobile system for image bulk storage . . . 260
Molecular beam epitaxy of multilayer structures 143
Molecular beam epitaxy of Si on GaP and GaAs 154
MOS devices, behaviour of oxide film in . . . 330
Multiplexing and demultiplexing in an optical communication system . . . 344
Navigation and information system for cars, CARIN . . . 317
Nickel-hydride cell, new type of rechargeable battery . . . 22
Noise due to optical feedback in semiconductor lasers . . . 292
Oxide film in MOS devices, behaviour of . . . 330
PHILAN, fibre-optic local-area network . . . 10
Pressure transducer, differential ceramic . . . 86
Proton magnetic-resonance tomography . . . 95
Quantitative measurements by the Schlieren method . . . 184
Quartz, selection of, for resonators . . . 214
Schlieren method, for quantitative measurements . . . 184
Selection of quartz for resonators . . . 214
Semiconductor lasers, noise in, due to optical feedback . . . 292
Semiconductor structures, layered, research on 111
Solar collectors, black-cobalt coating for . . . 244
Speech segmentation, automatic . . . 233
Television glass, research on . . . 253
Television technology, HD-MAC, a step forward in . . . 197
Television test decor . . . 192
Then and now (1937-1987)
  lighting the Eiffel Tower . . . 61
  high-pressure mercury lamps . . . 94
  measuring instruments . . . 183
  television projection tubes . . . 213
  transmitting valves . . . 243
  permanent magnets . . . 303
  high-voltage rectifiers . . . 343
Thermodynamic equilibrium and metastable phases . . . 304
Wavelength-division multiplexing in optical communication system . . . 344
